Lessons This Week

This week we started learning about the Platonic solids shapes. The students had to find the number of faces, vertices, and edges of a hexahedron, tetrahedron, octahedron, dodecahedron and an icosahedron. They are currently making small models of the solids. Part of their writing lesson this week was editing their work. They are preparing for a writing celebration where they share a piece of their writing with their classmates. They had an editing checklist they had to follow to polish their writing piece. Then they had to enlist a friend to edit their piece as well. A science background reading introduced the exciting topic of combustion. Working with fire is always fun.

The students have started working on their plans for the annual L3 Haunted House. It is tradition for the 8th grade students to decide the groups and map out each location. It is a great experience for the students to work together as a team to come up with ideas and plans and for them to work hard to implement the concepts.

Upcoming Events

October 26	Spelling Test 5A
October 26	FELT
October 30	Haunted House Setup
October 31	Haunted/Fun House
November 1	Land Lab Trip
November 2	Spelling Test 5B

November 16	Grandparents/Special Friends Day
November 19-23	Thanksgiving Break
November 30	Spelling Test 6B
November 30	FELT
November 30	L3 Dance
December 8	Holiday Music Program

Volunteer Experience

We had the opportunity to help homeless students in Manatee County this week. Our class helped to pack over 400 bags with food for these students to take home over the weekend. This is the fourth year for the 6th grade students to volunteer at FELT. We will be going once a month. It is a great opportunity for them to realize how fortunate they are and to help kids their own age.
