Lessons This Week

Last week was our immersion week. The students have completed their second six-week work cycle. Immersion week is an opportunity for the students to finish any work and catch up on projects before starting a new work cycle. The students continued to work on their math lessons and had the chance to correct tests in vocabulary.

This week we started our new work cycle. The students had a lesson on tessellations. They learned how they originated in Rome as decorative tile mosaics, then students used the cut method to create their own tessellated design.

We started the novel *Iqbal*, a true story about a young boy who was a child slave in Pakistan's carpet industry.

Upcoming Events

January 18	Car wash and pasta dinner fundraiser for Mara
January 21	No School
January 30	Book Report Due
February 23	Toothpick Bridge Competition

FELT

Feeding Empty Little Tummies

Our students really enjoy our monthly trip to volunteer to pack bags of food for homeless children so they have food to eat over the weekend. Thank you to **Christine Bouquin** and **Natalja Jarova** for driving!

We had a great trip to the Land Lab last week. The students helped trim the oak trees to raise the canopy, worked on building a Hugel Kultur, and worked on our water collection system.
