

6th Grade News

August 28, 2020

We have had a fantastic couple of weeks! The students have settled into our routines and are working hard! They have had lessons on divisibility, base 10, grammar editing, reading comprehension, spelling, vocabulary, personal learning styles, and have started adding items to their writer's notebook. We have completed our two week orientation workplan and will officially start Cycle One next week!

An important reminder:

Students may not have phones out at school. If it is necessary for them to have one in their backpack it must be powered off and stowed away while on campus.

Each year our E2 and L3 students take the Stanford Achievement Test at the end of the year. Unfortunately, we were unable to test last year because of the school being closed. This week our students began taking some of the sub-tests and will continue next week. This is a great way to see progress through out the years.

Thank you to Micah's family for donating food and drinks for our snack business!
