

6th Grade News

Oct. 2, 2020

The students have learned about relative humidity and used a sling psychrometer to take measurements each day. They saw a big drop in humidity after the air turned cooler. We had a lesson on the order of operations. Students created their own acronym to help them remember the correct order for solving problems. We have been researching gifts from ancient civilizations that are still used today. Some examples include roads, bronze, and the wheel. The students created their own card materials to add to this lesson.

Important Dates

Our Students are so thoughtful! After hearing about the passing of Erica's mother, they immediately started making cards and created this display for her

We are looking for a classroom parent to help with special activities and events. Let me know if you are interested.
