

6th Grade News

Oct. 9, 2020

We continued our work on order of operations this week. The students completed math problems to come up with the measurements to make chocolate fudge. Our Earth Science lessons for this work plan were about the water cycle. The students created bracelets with colored beads to represent the different stages. We had a whole group lesson for geometry that covered point, line, and plane. The students have been creating Kahoot tests for each other during their free time. Some of them relate to our curriculum and some are just for fun.

Important Dates

Oct. 12	No School
Oct. 13	Parent Zoom
Oct. 23	Spelling Test 5
Oct. 30	Vocab. Test 5
Oct. 30	Costumes and special lunch
