

6th Grade News

September 18, 2020

This week the students began taking math tests. Each student has been working on math lessons in their textbooks for homework each evening. Now, they have started testing to check for mastery or if they need some more practice on the skills. The students shared the information they learned about the atmosphere by creating a rap video. The writing prompt from this work cycle was about the student's favorite childhood toy. The students have started taking turns with running the class meeting and working in the school store.

Important Dates

Sept. 18	Spelling Test 3
Sept. 24	Vocab. Test 3
Sept. 25	No School
Oct. 2	Spelling Test 4
Oct. 9	Vocab. Test 4
Oct. 12	No School
Oct. 23	Spelling Test 5

Each morning during our class meeting, we take a few minutes to review some basic math skills. Students are given problems to complete on their dry erase boards. Lately we have been practicing changing fractions to improper and mixed numbers. Do you remember how to convert $4 \frac{2}{3}$ to an improper fraction?

Thank you to Maya's family for donating seltzer water to the school store.
